

## Implementation of MiFID ESG preferences in wealth management

### Purpose

This document provides information about the current implementation of Markets in Financial Instruments Directive (MiFID) ESG preferences for the managed solutions offered by Vontobel. As part of the regulatory requirements of the Sustainable Financial Disclosure Regulation (“SFDR,” Regulation (EU) 2019/2088) and the EU Taxonomy (“EUT,” Regulation (EU) 2020/852), Vontobel has defined the relevant criteria and is currently guided by the proportions in the following overview in the mandates for each ESG preference.

### ESG criteria

Different sustainability strategies can be chosen depending on the mandate. The ESG criteria used for the respective sustainability strategy are described in the relevant product information. The criteria with which the mandates are aligned according to Principal Adverse Impact (“PAI”), SFDR and EUT are described in the “Sustainable investing under the new EU regulatory framework” brochure. This can be found on our website: [vontobel.com/mifid](https://vontobel.com/mifid).
